

THE AWAKENING

SURVIVE. AWAKEN. EVOLVE.

Begin as an ordinary survivor. After ten minutes of active play, your next night brings a five-second awakening: particles, a new instinct, and every weakness of your chosen origin.

POWER FOLLOWS YOUR NATURE

Hunt, harvest, leap or mine. Normal Minecraft XP and your origin activities earn EXP. Complete themed trials to evolve, then choose which unlocked skills to improve. Press P for your status, quests and instructions.

A SYSTEM THAT REMEMBERS

Fourteen starting origins, ten evolution levels, and permanent skill upgrades. Your world saves your progress outside the JAR. A werewolf bite can also create a loyal Beta Werewolf whose strength follows its turner.

QUICK START / 2 **ORIGINS / 4-10** **RELICS / 13**

Quick start / EXP, quests and P

AWAKEN

Complete 10 minutes of active-play grace, then wait for night. The five-second ritual activates most powers and all drawbacks. Offline time does not count. The awakening subtitle now fits beneath the origin name.

EARN EXP, EVEN WITHOUT A QUEST

All positive normal Minecraft XP earned after awakening also adds lifetime evolution EXP: mobs, XP-bearing ores, smelting, breeding, trading and XP bottles. These extra origin bonuses use the normal XP bar too:

ORIGIN	EXTRA EXP
Hunting origins	12 per creature killed; excludes players and tamed pets.
Grasshopper / Sneaky Squirrel	3 per mature crop or cocoa block broken.
Rubberband Man	2 per jump; 2 per knockback block, up to 16 per hit.
RPI Student	4 per supported ore block mined.

Hunting origins = the other ten starting origins. Beta Werewolves have inherited progression instead; see the Werewolf abilities on page 8.

TWO BALANCES

Spendable EXP is your current Minecraft XP points: use it for skill upgrades, enchanting or repairs. Lifetime EXP never falls when you spend XP or die. Evolution 2-10 needs both lifetime EXP and a fresh themed trial; see page 12.

PRESS P

Upgrades: browse one skill at a time; see its effect, cost, current EXP and level. Skills: descriptions and controls appear only after unlocking. Quests: objectives, progress, reward and free swap (20-second cooldown). Evolution: your next EXP threshold and trial. /ott menu opens the same window; rebind P in Controls.

QUESTS THAT FIT YOUR ORIGIN

Each starting origin has 16 quest templates, unlocked gradually. Recent tasks are avoided; difficulty and rewards grow with evolution. Completion has an eight-second title. The next task is announced after 30-150 seconds of active play. Visible nearby threats can create specific-target quests. Routine progress stays under P; original supply milestones pay once.

Skills / Choose what to develop

Unlocked skills work automatically. Each starting origin has three stat upgrade paths. Skill levels 2-5 cost 30 / 60 / 150 / 300 EXP points and need Evolution 1 / 2 / 3 / 4 respectively, or the ability unlock if later. The last two purchased ranks add half steps. Spending EXP never removes your evolution.

ORIGIN	THREE UPGRADE CHOICES
Dragon	Fire Breath / Fireproof Scales / Dragon Stature
Grasshopper	Spring Legs / Quick Feet / Fragile Body
Minotaur	Bull Vitality / Heavy Hits / Heavy Hooves
Yeti	Mountain Giant / Thick Fur / Mountain Legs
Rubberman	Elastic Strikes / Springy Legs / Impact Resistance
RPI Student	Above Average / Sleep-Deprived Commute / Engineering Efficiency
Vampire	Night Stalker / Blood / Bloodlust
Wight	Undead Vigor / Natural Thorns / Life Drain
Wendigo	Endless Hunger / Hunger Driven / Night Hunter
Werewolf	Claws / Predator's Senses / Moon-Fed Strength
Berserker	Brutal Strength / Bone Armor / Beast Recovery
Kanima	Venomous Claws / Reptilian Scales / Regenerative Flesh
Sneaky Squirrel	Lightweight / Fragile / Smol Stature
Hell Hound	Hellfire / Ashen Recovery / Explosion Resilience

Beta Werewolves have no independent upgrades or evolutions. Their P menu shows inherited skills, and they gain strength as their turner evolves or upgrades. Alpha powers are excluded.

Choose your nature

GREEN / BENEFIT RED / DRAWBACK GOLD / MIXED

DRAGON

Fire within. Freedom above.

Fire Breath [Primary]: Exhale flame toward your enemies.

Wings [Secondary]: Call on your wings to take flight.

Fireproof Scales: Fire cannot bite through your scales.

Dragon Stature: Your larger body changes where you fit.

Dragon Sight: Your eyes see the world through a tinted veil.

Ravenous: A dragon needs more than a small meal.

Doused: Water is an enemy of your inner flame.

ORIGIN ACTIVITIES / Hunting living mobs

GRASSHOPPER

Small steps hide great leaps.

Tiny Hopper: Small passages welcome your tiny frame.

Wings and Spring Legs: Leap high and let your wings carry you.

Quick Feet: Small feet move with surprising speed.

Green Trail: Your passage leaves signs of nature.

Fragile Body: Your small frame cannot take many hits.

Small Pockets: Your frame limits what you can carry.

Raw Herbivore: Seek uncooked plants for your next meal.

Frog Terror: Keep your distance from hungry frogs.

Tiny Reach: Your tiny arms cannot reach as far.

ORIGIN ACTIVITIES / Ripe harvests

Choose your nature

GREEN / BENEFIT RED / DRAWBACK GOLD / MIXED

MINOTAUR

A stubborn force, far from home.

Bull Vitality: A bull's endurance keeps you standing longer.

Heavy Hits: Your blows carry the weight of a bull.

Horn Rush [Primary]: Charge forward and punish foes in your path.

Heavy Hooves: Land and water both feel slower beneath you.

Great Appetite: A large body needs frequent meals.

Herbivore: Your stomach accepts a plant-based diet.

Snowbound Weakness: Snow country slows and weakens your strength.

ORIGIN ACTIVITIES / Hunting living mobs

YETI

The mountain shelters you. Warmth does not.

Mountain Giant: Your imposing body brings strength and size.

Thick Fur: Dense fur helps soften incoming blows.

Frostproof: Freezing cold cannot claim your furred body.

Snow Runner: Snowy terrain favors your stride.

Mountain Legs: Your legs find routes up the mountain.

Frost Roar [Primary]: Roar to unleash winter against nearby foes.

Heat and Hunger: Warm climates make your hunger harder to satisfy.

Thawing: Warmth drains your reserves of cold.

Overheated: Too much heat leaves you vulnerable.

Cold Reserve: Gather cold to sustain your winter powers.

Heavy Swimmer: Your heavy body swims 30% slower.

Slow Swings: Your heavy arms attack 15% slower.

ORIGIN ACTIVITIES / Hunting living mobs

Choose your nature

GREEN / BENEFIT RED / DRAWBACK GOLD / MIXED

RUBBERMAN

Bend with the world. Mind its edges.

Elastic Strikes: Your blows send enemies farther away.

Bouncy Body: Enemy blows send you flying farther.

Springy Legs: Elastic legs spring into higher jumps.

Soft Landing: After awakening, falls up to 15 blocks are safe; larger falls remain cushioned.

Fragile Rubber: Flexibility comes with fewer hearts to spare.

Elasticity: Your flexible body has unusual ways to recover.

Cold Vulnerability: Freezing conditions punish your rubber body.

Impact Resistance: Blunt impacts meet a yielding defense.

Cleavable: Sharp edges cut deeper than blunt blows.

ORIGIN ACTIVITIES / Leaps and launching foes

RPI STUDENT

Bright ideas. Long nights.

Above Average: You stand a little taller than most.

Campus Appetite: Long days leave you hungry more often.

Sleep-Deprived Commute: Tired legs make your journeys slower.

Student Discount: Your student status helps when trading.

Engineering Efficiency: Useful ores reward an engineer's approach.

Homework: Unfinished work keeps you from sleeping.

ORIGIN ACTIVITIES / Mining useful ores

Choose your nature

GREEN / BENEFIT RED / DRAWBACK GOLD / MIXED

VAMPIRE

The night offers what daylight takes.

Night Stalker: Darkness favors your senses and hunting.

Blood: Your blood reserve sustains your powers.

Blood Drainer: Drain living prey to replenish your blood.

Bloodlust: A full reserve makes the hunter stronger.

Bat Form: A smaller winged form awaits in the night.

Cursed by the Sun: Unshielded daylight threatens your survival.

Carnivore: Your hunger calls for meat.

ORIGIN ACTIVITIES / Hunting living mobs

WIGHT

Something lingers beyond the grave.

Withered Spirit: Your withered nature changes life and survival.

Undead Vigor: Your undead body endures beyond ordinary flesh.

Natural Thorns: Striking you can wound the attacker in return.

Life Drain: Your attacks steal vitality from living prey.

Carion Feast: Decay can serve where ordinary meals fail.

Sun Frailty: Daylight leaves your undead body weaker.

ORIGIN ACTIVITIES / Hunting living mobs

Choose your nature

GREEN / BENEFIT RED / DRAWBACK GOLD / MIXED

WENDIGO

The hunger never truly sleeps.

Endless Hunger: Feeding is at the heart of your survival.

Hunger Driven: A fed hunter finds greater strength.

Rumbling Stomach: Eating leaves a brief weakness in its wake.

Primal Appetite: Some meals suit the predator better than others.

Night Hunter: Darkness cannot hide your prey as easily.

Stalker: Your presence can slip out of sight.

Limb Stalker: Your strikes slow prey and reveal its outline.

Cold Friend: Cold country offers an unusual advantage.

Fire Curse: Fire is especially cruel to your cursed body.

ORIGIN ACTIVITIES / Hunting living mobs

WEREWOLF

The moon calls. The pack listens.

Forms / Physique: Call forth the beast, or conceal it behind a human face. Claws, strength and a changed voice follow.

Woodland Instinct: The forest yields to your changed forms. Even the bones of your prey can nourish you.

Predator's Senses: Darkness reveals prey; a dangerous black bloom is harder to overlook.

The Hunt: Answer the moon's hunger and earn its favor. Ignore it at your peril.

Unarmored / Silver: The curse refuses armor. Iron carries a silver-like sting.

WolfsBane: A black-petaled flower poisons those who linger near it. Pots offer no refuge.

Black Coatings: The flower's extract can darken a weapon. Its bite is especially cruel to wolf-kind.

Alpha / Pack Call: Wild wolves recognize a leader. Call your pack close, or command it to wait.

The Bite: A transformed, crouching, empty-handed strike may pass on the curse. Some hosts survive; others do not.

Blood-bound Packmate: A villager may become a stronger, loyal wolf with crimson eyes and no collar.

Full-moon Frenzy: The moon can break a packmate's obedience. A blow from its turner can restore recognition.

Beta Werewolf: A surviving player takes on a new nature. Its strength follows its turner, and loyalty binds its claws.

Beta Limits: A Beta cannot lead, pass on the curse, develop powers independently or strike its turner.

ORIGIN ACTIVITIES / Hunting living mobs

Choose your nature

GREEN / BENEFIT RED / DRAWBACK GOLD / MIXED

BERSERKER

Rage wakes something beneath the bone.

Brutal Strength: Your beast form makes every blow heavier.

Bone Armor: Bone shields the beast beneath your skin.

Blood Rage: Let your rage carry the fight.

Beast Recovery: A well-fed beast mends its wounds.

Ravenous Beast: Your beast form doubles exhaustion from activity.

Berserker Form [Primary]: Call forth a stronger, armored shape.

Bone Cage: Your beast form cannot wear chest armor or an elytra.

Heavy Swings: Your beast form attacks 20% slower.

Rage Crash: Leaving beast form causes Weakness I for 10 seconds and Slowness I for five.

ORIGIN ACTIVITIES / Hunting living mobs

KANIMA

A patient predator with a venomous secret.

Kanima Form [Primary]: Wake the scaled predator within.

Venomous Claws: Your transformed strikes leave poison behind.

Wall Crawler: The beast finds purchase on vertical walls.

Reptilian Scales: Scales soften blows against your beast form.

Regenerative Flesh: Keep the beast fed and wounds begin to close.

Tail Lash [Secondary]: Your transformed tail can punish nearby prey.

Predator Appetite: Your beast form hungers more quickly.

After the Hunt: Returning to yourself leaves you drained.

ORIGIN ACTIVITIES / Hunting living mobs

Choose your nature

GREEN / BENEFIT RED / DRAWBACK GOLD / MIXED

SNEAKY SQUIRREL

Light feet. Hungry heart. Hidden gifts.

Sneak 100: Crouch to hide yourself and your armor.

Exalted: Golden apples leave unusually lasting protection.

Fast Eater: You finish your meals before others do.

Flight: Built-in wings leave room for armor.

Lightweight: Run, leap and climb through natural terrain.

Fragile: Your nimble frame has little health to spare.

Small Pockets: Your small body limits your carrying space.

Smol Feet: Certain soft ground calls for proper footwear.

Fast Metabolism: Your quick body needs frequent meals.

Flammable: Fire burns your small frame especially fiercely.

Smol Stature: A smaller body opens smaller passages.

ORIGIN ACTIVITIES / Ripe harvests

HELL HOUND

Ash follows where you tread.

Hellfire: Your burning form scorches those too close.

Heat Wave [Secondary]: Release a burst of heat from your beast form.

Ashen Recovery: A fed hound heals through the ashes.

Death Sense: Your beast senses the dead and the unnatural.

Explosion Resilience: Blasts strike less deeply into your hide.

Burning Hunger: Your burning form doubles exhaustion from activity.

Hell Hound Form [Primary]: Unleash the stronger, burning hound within.

Doused Flame: Water or rain stops your transformed flames and healing, and drains half a heart every two seconds.

ORIGIN ACTIVITIES / Hunting living mobs

Server / Shared starts and safe updates

START TOGETHER

Before everyone joins, an operator uses `/ott pause`; when ready, use `/ott unpause`. Daylight and awakening countdowns wait while players can move. Pause survives restarts. Each dormant player then finishes their remaining grace period.

KEEP YOUR WORLD AND PLAYER DATA

Stop the server cleanly and back up the world. Remove the old addon JAR, install `origins-off-the-charts-1.21.1-v2.19.jar` on the server and every client, then restart. Use one addon version at a time. Keep Minecraft 1.21.1, Java 21+, Fabric API and compatible Origins dependencies.

PROGRESS LIVES OUTSIDE THE JAR

`World/playerdata/<player UUID>.dat` saves evolution, lifetime EXP, upgrades, quests, awakening, conversion timers and Beta bonds. Keep the same world and account UUIDs. Existing v2 progress migrates automatically. Existing villager-converted wolves are corrected to 60 maximum health; no reset is needed.

CHECK, BACK UP, ROLL BACK

Open P after updating to check your progress. Beta Werewolves see inherited progression. Ordinary origin changes start a new progression; failed player conversions keep the previous one. For rollback, restore the world backup with its matching addon version. Never delete `playerdata` to update.

OPERATOR COMMANDS

`/ott awaken <players>`: five-second ritual, bypassing grace/night/pause. `/ott evolve <players>`: one evolution level. `/ott unlockshop <players>`: remove purchase locks, keeping EXP costs. `/ott maxupgrades <players>`: Evolution 10 and all skill upgrades. Targets accept @s, @a or names; these commands do not independently upgrade Betas.

FINDING HIDDEN ITEMS

Unopened dangerous chests have a separate 18% relic roll: ancient cities, bastions, fortresses, End cities, mansions, strongholds and dungeons. The Blackened Heart is rarer. Natural chests also have a 12% chance of rodent repellent or a bug trap. Opened chests never reroll; see page 13 for relic controls.

Evolution / EXP and themed trials

Awakening is Level 1. Every new evolution needs lifetime EXP AND a fresh trial. EXP carries forward; trial counts restart at each level. Existing saved evolutions stay unlocked. Open P > Evolution for your exact current requirement.

LEVEL	HUNTER EXP	NON-HUNTER EXP
1	0	0
2	210	105
3	700	350
4	1680	840
5	3150	1575
6	5250	2625
7	8050	4025
8	11900	5950
9	16800	8400
10	23100	11550

EARLY TRIALS / LEVELS 2, 3, 4

Hunters: 10 creatures; 30 hostiles; then a player OR 3 enemies with at least 40 maximum health.
 Grasshopper: 16 ripe crops; 50 jumps; 200 glide blocks. Squirrel: 20 crops; 40 logs; 300 sneak blocks.
 Rubberband Man: 60 jumps; 60 launched blocks; 1,000 sprint blocks. Student: 20 ores; 50 logs; 6 diamond ores.

LATER TRIALS / LEVELS 5-10

Hunters alternate themed kills with hostile kills: Werewolf/Vampire/Wight/Wendigo hunt at night; Yeti in cold biomes; Hell Hound/Dragon in the Nether; Berserker in beast form; Kanima poisoned foes; Minotaur bare-handed. Counts rise by (level - 3) x 15. The final hunter trial is 175 enemies with at least 40 maximum health.

Non-hunter trials alternate: Grasshopper crops/gliding; Squirrel harvest/logs/gliding; Rubberband Man jumps/launches; Student ores/diamonds. Counts use (level - 3) x 32 crops or 300 glide blocks; x 48 harvest/logs or 350 glide blocks; x 90 jumps/launches; x 50 ores or 8 diamond ores respectively. Their EXP and trial counts are easier; quest payouts stay unchanged.

Threat quests mark a visible hostile within 24 blocks. Only your kill of that target completes it; reward scales with evolution and enemy health. If it disappears, the task cancels and another is scheduled. Free swaps give no reward. Beta Werewolves have no independent evolution trials or upgrade purchases.

Hidden relics / A short field reference

Use = right-click. Hold = main hand or offhand. Carry = anywhere in inventory. Relics answer their intended origin; charged Dragonfire Bottles, repellent and traps can be used by anyone. Empty charges cannot activate effects. Repellent/traps also appear in natural chests. Their penalties end 5s after leaving the area.

RELIC / ORIGIN	USE AND LIMIT
Wolfsbane Antidote / Werewolf	Use once: clears poisoning; suppresses wolfsbane for 90s.
Moonstone Amulet / Werewolf	Use: 120s of moon control. Three charges; hunt duties remain.
Silver Restraint Charm / Werewolf	Hold: softens silver damage, poison and recovery lock. 120 hits.
Blood Flask / Vampire	Carry to bank blood from kills (40 max); use to drink stored blood.
Daylight Ring / Vampire	Hold: sunlight protection. Depletes after 120 exposed seconds.
Bloodstone / Vampire	Carry: slowly banks surplus blood (20 max); releases at low reserve.
Kanima Venom Vial / Kanima	Sneak-use extracts a dose; use throws paralysis poison. 5-min recovery.
Kanima Suppressant / Kanima	Use once: 120s of reduced form drain and faster stamina recovery.
Wight Soul Vessel / Wight	Sneak-use banks absorption (24 max); use restores up to eight points.
Blackened Heart / Wight	Hold: one death rescue. Leaves severe weakness and hunger. Very rare.
Cooling Talisman / Wendigo	Carry: suppresses heat penalties. Degrades over 180 hot seconds.
Frozen Heart / Wendigo	Use once: 180s of strength, speed and reduced hunger drain.
Dragonfire Bottle / Dragon	Dragon sneak-use charges breath (2-min recovery); use releases fireball.
Rainward Charm / Dragon	Hold: halves origin water damage. Depletes over 180 wet seconds.
Weighted Boots / Grasshopper	Use: 60s of grounded jumping. Six charges.
Frog Repellent / Grasshopper	Use: 120s of frog relief and repulsion. Three charges.
Elastic Wrap / Rubberband Man	Hold: reduces received knockback by 60%. 180 impacts.
Compression Ball / Rubberband Man	Hold: stores received knockback; releases it into the next melee hit.
Cramming Notes / RPI Student	Use: removes commute slowdown for 120s, then severe hunger for 60s. Three uses.
Student ID / RPI Student	Carry: additional villager discount. 100 shop sessions.
Rodent Repellent / Anyone	Use: 20s, radius 6. Slows/weakens squirrels; blocks stealth/gliding. 3 uses.
Bug Trap / Anyone	Use: 60s, radius 2. Slows/weakens grasshoppers; blocks springs/gliding. 3 uses.
